Photo Editor 2008

Your digital designer

ACDSee Photo Editor 2008 has all the tools, inspiration and clear instruction you need to turn your digital photos into truly captivating keepsakes.

New in ACDSee Photo Editor 2008

Advanced Text Options

- Add interest to layouts with text that follows a custom path.
- Wrap text inside any one of over 400 available shapes.

Powerful Layout Tools

- Start with Designer Templates for extra inspiration.
- Apply one or more of over 70 Dynamic Adjustments effects to photos and images.
- Trim a photo to any shape with Trim to Shape for custom styling.
- Use Masking to 'knock out' areas of a photo without changing the original image.

Enhanced Usability

- Complete projects faster with the improved speed and functionality.
- Easily export photos to various formats and preview the results with Save to Web.

Make the most of your photos with ACDSee Photo Editor 2008! Create personalized greeting cards, scrapbook pages, invitations and more. With Photo Editor's easy to use artistic text, layout and editing features, you'll be amazed at what you can do with your photos.

Create Custom Text Paths

Add interest to your layout with text that follows your own path. Use the drawing tools to create paths that follow elements in your layout, like the hem of a dress or the flow of a river.

Try new Preset Text Paths

Use the preset text paths to complete your projects even faster. Select one of a number of interesting designs, including the new Spiral, Bracket, Curlicue, Flower, Star, Heart or Leaf paths.

Create Custom Text Shapes

Photo Editor 2008 makes it even easier to add journaling elements to a project. Wrap words inside any one of over 400 available shapes or draw own custom shape. Add large journaling blocks into these shapes with ease.

Start with Designer Templates

When inspiration is needed to help get started, try one of Photo Editor's templates, designed by top digital designers Andrea Gold, Maggie Lamarre and Vicki Stegall. Or create layouts and save them as templates for future use.

Save to Web

Easily export your photos to JPEG, GIF, or PNG format and preview the results with the new Save to Web feature.

Apply Adjustments Dynamically

Dynamic Adjustments gives the freedom to experiment knowing that the original image stays intact. Apply one or more of over 70 effects like Sepia and Gaussian Blur. Quickly modify existing effects, switch their order for a different result, delete an effect, or remove them from the object altogether.

Trim to Shape

Quickly crop an image with any shape with Photo Editor's new Trim to Shape feature. Use the shape tools, create a custom shape or use objects in a layout as the crop outline for a favorite photo.

Attach Masks

Use a shape or image object to 'knock out' areas of another image. Similar to Trim to Shape, Masks preserve the original image and can be easily removed by selecting Image | Mask | Detach Mask.

Try the new Drop Shadow

Photo Editor 2008's new default drop shadow provides a more realistic look. Opacity controls are now built directly into the drop shadow dialog for improved ease of use.

Rotate your Crop

With Photo Editor 2008, cropping selections can easily be rotated to achieve exactly the look wanted.

Easily select overlapping objects

Selecting overlapping objects is now even easier with the Select submenu. In an area where objects overlap, right-click and use the Select submenu to select the appropriate object.

Use brushes

Easily open, load and use brush files to enhance layouts. Open an .ABR., .JBR or .PBR brush file and define up to ten selected objects as brushes with the Object | Create Brush command.

System Requirements

Hardware

- Intel® Pentium® 4-class or equivalent
- 1 GB RAM (2 GB RAM recommended)
